SOURCE-VERIFIED

ON-TIME DELIVERY
93.23%
89,936 of 96,470 eligible orders

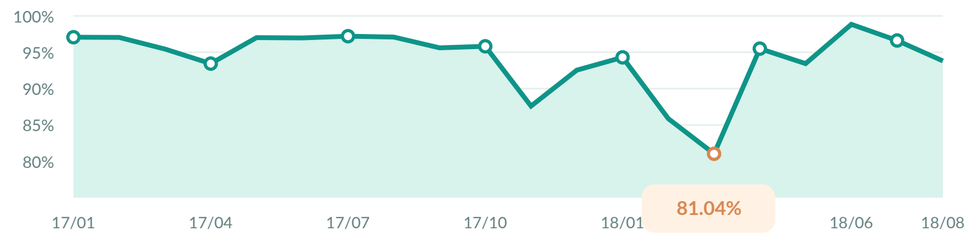

LATE DELIVERIES
6,534
6.77% of eligible deliveries

ELIGIBLE DELIVERIES
96,470
Actual and estimated dates available

CANCELED ORDERS
625
0.63% of 99,441 orders

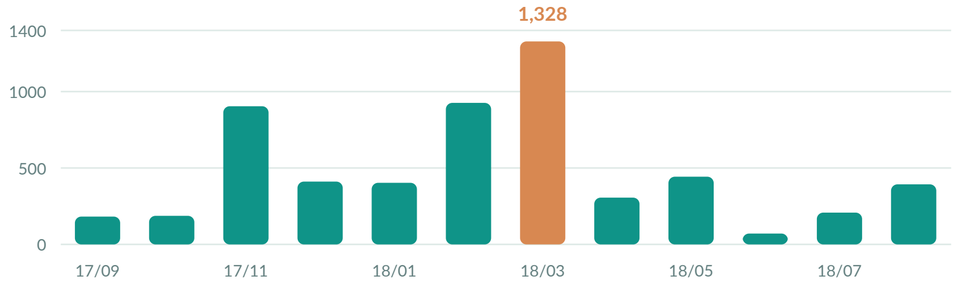

On-time rate by purchase month

20 monthly cohorts · Jan 2017 to Aug 2018

Late deliveries by month

Most recent 12 meaningful cohorts

PERIOD TO INVESTIGATE

March 2018 · 81.04%

7,003 eligible deliveries; 1,328 were late.
Compare carrier events, dispatch and order mix.
A high exception count does not establish root cause.

HOW TO READ THESE NUMBERS

On time = actual date ≤ estimate

All-time rate uses 96,470 eligible delivered orders.
Monthly trend excludes tiny 2016 and late-2018 cohorts.
Not supplier inbound OTIF.

02 / CUSTOMER DESTINATIONS

Where do delivery outcomes differ?

OLIST · REAL DATA

Service performance by Brazilian customer state, with cohort size shown.

ELIGIBLE DELIVERIES

96,470

Across all customer destinations

SÃO PAULO · SP

95.51%

40,494 eligible deliveries

RIO DE JANEIRO · RJ

87.89%

12,350 eligible deliveries

LATE ORDERS

6,534

Across 27 destination states

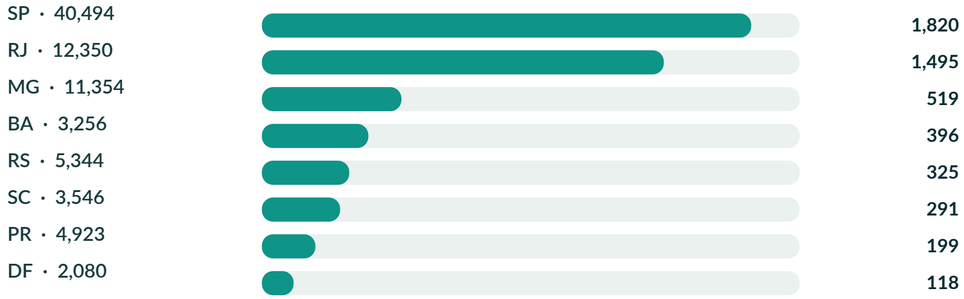

On-time rate by state

Eight largest customer destination cohorts

Late orders by state

Same customer states; absolute counts

SERVICE GAP

SP 95.51% vs RJ 87.89%

A 7.62 percentage-point observed difference.
Regional rates have different denominators.
State means customer destination, not seller origin.

OPERATIONAL PRIORITY

Investigate, then act

Use routes, carriers and order characteristics to test why service levels differ by location.
These aggregates do not show a proven cause.

How does delivery relate to reviews?

OLIST · REAL DATA

Observed relationship between customer delivery timing and review scores.

ON-TIME REVIEW

4.29 / 5

89,443 reviewed on-time orders

LATE REVIEW

2.27 / 5

6,381 reviewed late orders

LOW RATING · ON TIME

9.23%

Share receiving 1–2 out of 5

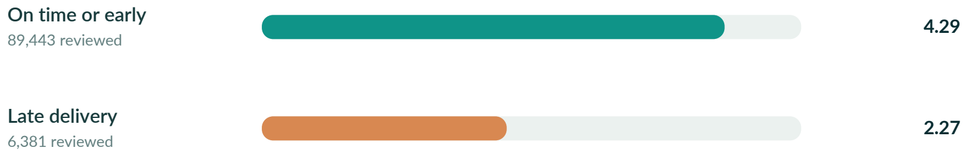

LOW RATING · LATE

62.36%

Share receiving 1–2 out of 5

Average customer review score

Valid reviews only · rating scale 1 to 5

Higher rating for the on-time group; no causal inference.

Share of low customer ratings

Orders rated 1 or 2 out of 5

Low ratings are 53.13 percentage points more common in the late group.

REVIEWED SAMPLE

95,824 eligible reviewed orders

89,443 on-time/early + 6,381 late.
Multiple reviews per order are averaged first.
This is not the total count of all source review events.

ANALYTICAL BOUNDARY

Association, not causation

Delivery timing and customer feedback move together.
Product quality and customer support may also matter.
Do not claim delays alone caused low scores.

04 / PRODUCT AND FREIGHT

Where is freight exposure concentrated?

OLIST · REAL DATA

Listed product values and freight across original Olist order-item rows.

LISTED ITEM VALUE

BRL 13.59M

All source order-item prices

LISTED FREIGHT

BRL 2.26M

Customer-side freight value

FREIGHT / ITEM

16.60%

Ratio of published total values

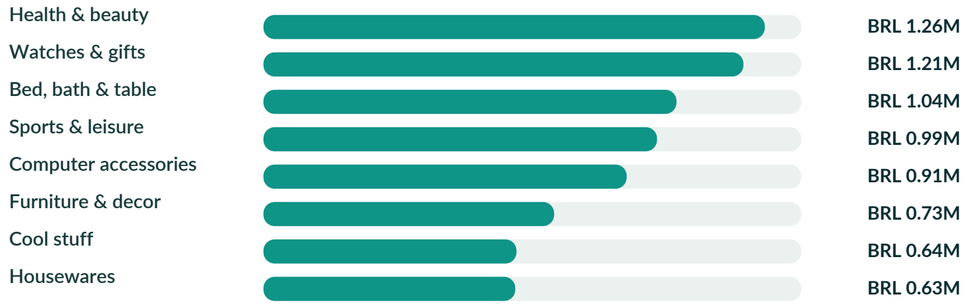

ORDER-ITEM LINES

112,650

Items in the original Olist source

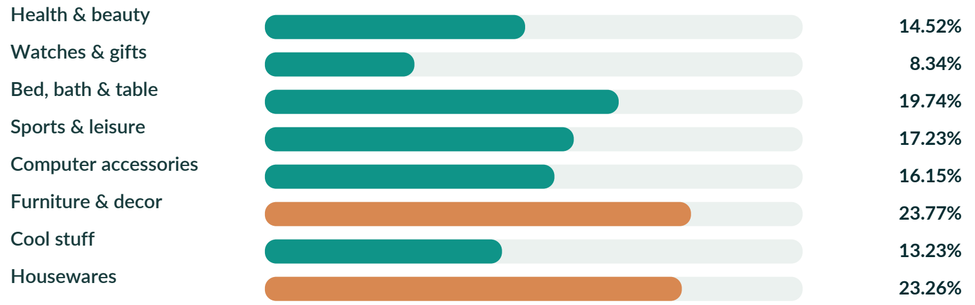

Largest categories by item value

Top eight categories · BRL

Freight as a share of item value

Same top eight categories · freight / item price

EXPOSURE WATCHLIST

Furniture & decor · 23.77%

Housewares · 23.26%; Bed, bath & table · 19.74%.
Higher freight share can guide further cost analysis.
Do not assume it measures underlying carrier expense.

SCOPE AND EVIDENCE

Listed freight ≠ carrier invoice

BRL 13.59M item value + BRL 2.26M freight listed.
All order-item statuses from source are included.
Not audited transportation cost or purchasing spend.
